

eMobility Construction Manager

Overview:

Founded in 2021 with the goal of reducing emissions from the transportation sector, Current Trucking deploys best available electric vehicles and charging infrastructure in the Class 3-8 segment. Our mission is to liberate customers from their fuel, service, and maintenance costs in operating traditional internal combustion engines. By leasing with Current Trucking, companies have the ability to drive towards their internal environmental goals while being compliant with broader Environmental, Social, and Governance (ESG) policies.

Position Summary:

The eMobility Construction Manager works alongside the Director of Engineering, Technology and Systems to foster great client relationships. Responsible for scope, schedule and budget while overseeing the construction of safe, high quality, and profitable, electric vehicle charging projects. Day to day activities include supervision of all on-site construction, including sub-contractors on the job, resolving day-to-day problems on the job site, and inspecting all work before and during construction to ensure compliance with plans and specifications. Works with the Contracts and Procurement Manager to solicit, review and award contracted work. This position seeks motivated, organized, and independent-minded individuals who will work to accomplish major project milestones while coordinating due dates and tracking information that is crucial to project success.

This position will be located in our Morristown, New Jersey Office but will require travel to Current's electric vehicle charging deployments throughout the United States.

Specific duties:

- Perform fundamental project management practices such as construction progress tracking, simple progress & financial forecasting, document management, problem solving, dispute resolution, design troubleshooting, and value engineering.
- Manages scope changes through change order policy, requests for information ("RFIs"), submittal logs, and applications for payment.
- Leads and enforces the safety policies and procedures and addresses non-compliance among all employees, subcontractors, and vendors on project sites.

Knowledge, Skills and Abilities:

- Mission-focused, decisive, and confident
- Ability to manage multiple, simultaneous projects.
- Strong oral, written, and interpersonal communication skills.
- Excellent organizational skills with attentiveness to timelines.
- Ability to work professionally with clients, vendors, employees, managers and supervisors.
- Experience leading and enforcing contracts, safety policies and procedures and addresses non-compliance among all employees, subcontractors, and vendors.
- Ability to work independently with limited oversight.
- Strong computer skills.

Qualifications:

- Motivated self-starter with a passion for combating climate change
- Three or more years of relevant construction industry experience with progressively greater responsibility
- Successfully led relatively complex construction projects

- Robust knowledge of various areas of construction (electrical, earthwork, utilities, mechanical, etc.)
- Expert knowledge of OSHA Safety regulations
- Valid motor vehicle operators license is required; Class A CDL is a plus.
- Transportation Worker Identification Credentials (“TWIC”) card preferred but not required.

Benefits:

Current offers competitive salary and bonus, as well as medical and dental benefits, paid time off, sick time and 410k Retirement.
