

eMobility Fleet Field Service Technician

Overview:

Founded in 2021 with the goal of reducing emissions from the transportation sector, Current Trucking deploys best available electric vehicles and charging infrastructure in the Class 3-8 segment. Our mission is to liberate customers from their fuel, service, and maintenance costs in operating traditional internal combustion engines. By leasing with Current Trucking, companies have the ability to drive towards their internal environmental goals while being compliant with broader Environmental, Social, and Governance (ESG) policies.

Position Summary:

The eMobility Fleet Field Service Technician will be responsible for managing and leading the successful deployment of electric vehicles (EVs) within the organization. Responsible for the successful integration and operation of EVs across various platforms and systems with customers and stakeholders. Works closely and coordinates with the Manager of Commissioning & Operations to ensure timely and seamless integration of newly deployed EVs to the respective customer. This position seeks motivated, organized, and independent-minded individuals who will work to accomplish major project milestones while coordinating due dates and tracking information that is crucial to project success.

This position will be located in our Morristown, New Jersey Office but will require short-term travel to various project sites throughout the United States.

Specific duties:

- Develop and implement strategies to enable efficient and reliable EV interoperability.
- Collaborate with internal teams and external partners to define and maintain interoperability standards and protocols.
- Oversee the integration of EVs into existing systems, ensuring compatibility and efficient communication.
- Identify and address interoperability challenges, troubleshoot issues, and implement effective solutions.
- Manage the deployment process for new EVs, including planning, logistics, and coordination.
- Conduct regular performance evaluations and audits to assess the effectiveness of EV interoperability initiatives.
- Stay updated with industry trends, emerging technologies, and regulations related to EV interoperability.
- Provide training and support to internal stakeholders on EV interoperability best practices.

Knowledge, Skills and Abilities:

- Mission-focused, decisive, and confident
- Ability to manage multiple, simultaneous vehicle deployments.
- Strong oral, written, and interpersonal communication skills.
- Excellent organizational skills with attentiveness to timelines.
- Ability to work professionally with clients, vendors, employees, managers and supervisors.
- Ability to work independently with limited oversight.
- Strong computer skills.

Qualifications:

- Motivated self-starter with a passion for combating climate change
- Well versed in basic computer/laptop navigation and programs (Word, Excel, File Explorer, Adobe)
 - Preference given to candidates with more extensive computer skills.
- Individual must be mechanically inclined and be proficient with utilizing basic hand and power tools.

CURRENT®

- Preference is given to individuals who have knowledge of medium and heavy duty vehicles (Classes 2-8)
- Valid motor vehicle operator's license is required; Class A or B CDL is a plus.
 - CDL Class B License will be required for this position to allow movement of straight-line vehicles and bob-tail tractors. For the right candidate, Current Trucking will support training and licensing requirements to obtain a CDL Class B.
- A Transportation Worker Identification Credentials (TWIC) card is necessary and can be obtained after being hired.

Benefits:

Current offers competitive salary and bonus, as well as medical and dental benefits, paid time off, sick time and 401k Retirement.
